AURUM
CENTURY CLUB

THE AURUM CENTURY CLUB

presents

The *Kilo.*

Physical gold as the foundation. Private capital as the return.
A Singapore program for a founding group of qualified investors.

What is *inside*.

The program at a glance — followed by how it works, why this structure exists, and how new deals reach you.

I The Origin · *how the fund found its place* PG. 03
Why Aurum exists. The gap we saw, the three forces, the fund built to hold them.

II The program · *one kilogram, the founding 100* PG. 06
The program in a single page. What it is, what it costs, what a member receives.

III Mechanism · *two jobs, two engines* PG. 08
Gold protects, credit earns, both compound into member NAV.

IV The simplification · *once, not every time* PG. 11
The cross-border compliance gap — and how one subscription closes it.

V The Platform · *where new deals reach you first* PG. 13
Member-gated deal flow and live position visibility through the Aurum platform.

VI Featured deals · *the opening book* PG. 16
Two exceptional positions Aurum is sourcing to seed the fund — the $20M opening book.

I

The *Origin.*

What was missing.

The fund we built.

ORIGIN

The deals were there.
We built the mechanism.

The principals have backgrounds in *US private market investing* and *Korean cross-border capital placement. The capital was ready. The deals were available.* What was missing was the mechanism to hold them.

FRICTION

Demand *outgrew the structures* built to serve it.

Cross-border appetite for offshore private positions rose faster than the channels designed to receive it. Each direct deal triggered another regulatory filing, another AML review, another year-end line on the member's overseas account return. *The friction compounded with every deal.*

ACCESS

Institutional access *did not arrive* by accident.

The general partners that clear the kind of deal worth doing — the closed primaries, the curated secondaries, the disciplined credit books — work through long relationships, not broker channels. *The right counterparties were not advertising.*

THE GAP · DIRECT ROUTE

Two decades of capital arriving — at a structure that could not receive it.

韓

KOREAN HNW

Capital ready, *demand growing*

- Multi-generational wealth
- Hunger for institutional product
- Direct-deal appetite, *no path*

REGULATORY & ACCESS WALLS

FILING	CAP	AML	GP ACCESS
Per-deal capital filing	49-LP cap · 10% deal cap	AML review, every wire	Closed to single tickets

— each direct deal, another wall · each wall, another year of filings —

美

US INSTITUTIONAL

Closed primaries, *curated books*

- Pre-IPO secondaries
- Mid-market private credit
- GP-relationship gated, *not brokered*

SOURCED — × BLOCKED × — RECEIVED

DEMAND · HIGH

Each missed deal, a structural cost — not a market one.

RECEIPT · PARTIAL

Au *Aurum is the fund built to hold them.*

Three forces. *One fund.*

The decision was not what to build. The decision was where. Three answers came into alignment at one place — Singapore. Each has been understood, on its own, for decades. *The combination is what is new.*

I.

Access

The deals that do not advertise.

Pre-IPO secondaries and disciplined US private credit clear through GP relationships, not brokered channels. The principals' relationships in US private market sourcing span multiple cycles of US private market activity. *Members inherit the relationship — not the brokerage.*

SOURCED · GP-DIRECT · CURATED

II.

Singapore

Capital grows where it sits.

Singapore's Variable Capital Company holds offshore investments outside the Korean repatriation cycle. Income and gains accumulate at the fund level — *the growth stays where it is, compounding, not recurring.* expected Singapore VCC structure.

expected Singapore VCC

III.

Gold

Not the gift. The asset.

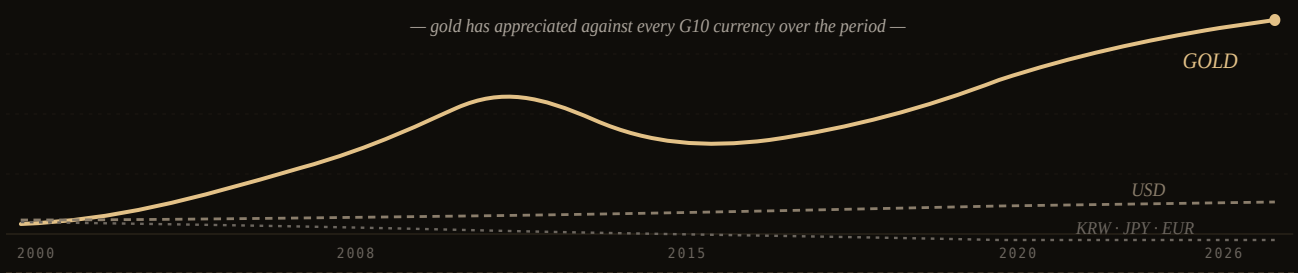
In Korea, gold is the wedding token, the quiet inheritance — *bought domestically at a premium few realize.* Across a generation, the asset has appreciated against every G10 currency. *Singapore is the world's deepest bullion market — where the bar also collateralizes credit.*

LBMA · ALLOCATED · SG HUB

Indicative · MMI–MMXXVI · spot $4,720/oz · 25-year arc · not a forecast

FORCE III · GOLD VS THE G10 · 25 YR

— gold has appreciated against every G10 currency over the period —



VS KRW	VS USD	VS JPY	VS EUR
~20×	~16×	~22×	~13×
25-year arc	25-year arc	25-year arc	25-year arc

PAST PERFORMANCE · The 25-year gold appreciation data shown is historical. Past performance is not indicative of future results. Gold price may decline. Provided for illustrative context only — not a representation of expected future Fund performance.

SAFETY — *Where these three meet — The Kilo.* — YIELD

Access opens. Singapore holds. Gold protects.

II

The program, *in one page*.

What it is, what it costs, what a member receives.

One kilogram. *The Founding 100.*

Physical gold is the qualifier. Private capital access is the product. What follows is what each *member* will receive at launch.

WHAT YOU HOLD

What *you hold.*

A member holds LBMA-grade physical gold in allocated custody at Singapore Freeport custodian. The bars are in the member's name, by serial number, insured under the custodian's standard insurance programme.

The gold also serves as collateral for a credit line at a Singapore institutional bank — *up to 75% LTV, per LP agreement parameters and sized to commitment level.* The metal never moves; the credit it unlocks deploys into Aurum Funds.

WHAT AURUM DOES WITH IT

What *Aurum does with it.*

Aurum Funds deploys the credit into *two sleeves:* pre-IPO growth equity (Series D+ AI, robotics, critical infrastructure) and US mid-market mid-market private credit (mid-single to low-double-digit gross target, with equity participation where structure allows). *Reinvestment is the default path* — fund-level returns compound across vintages.

WHAT YOU RECEIVE

What *you receive.*

Direct allocation in Aurum Fund deal flow. Curated pre-IPO equity and US private credit not commonly accessible through standard Korean retail channels. A kilogram of physical gold in your name, working as collateral while it appreciates. One Singapore subscription consolidating Singapore-side per-position reporting at the Fund level across every direct deal. *Quarterly reporting and full portal access are standard.*

III

One kilogram, *two jobs*.

How gold does two things at once. The structural gap. Why this structure exists only here.

One kilogram. *Two jobs.*

A single kilogram, at rest in a Singapore Freeport vault, simultaneously does *two jobs* — it protects the member, and it funds the institutional deal pipeline through a tiered credit line (up to 75% LTV, per LP agreement parameters and sized to commitment level). *No bank, no family office, no product in Asia combines the two.* Aurum provides that form.

JOB ONE

The bar *protects.*

Protection · unmoved · unseized

Allocated and segregated at Singapore Freeport. Serial-identified. insured under the custodian's standard insurance programme. The member's name on the certificate. *LTV monitoring with member alerts at 70% — 10 percentage points before the bank's margin threshold.* The metal is held in allocated, segregated custody — subject to custody agreement terms, insurance policy conditions (including per-event limits and exclusions), and applicable Singapore insolvency law. See PPM §14 for full custody, insurance, and segregation terms.

JOB TWO

The credit *earns.*

Production · deployed · productive

A credit line from a Singapore institutional bank, collateralized by the bar — up to 75% LTV, per LP agreement parameters and sized to commitment level. Proceeds deploy into pre-IPO equity and US private credit. *~15% base IRR target · new fund vehicle,* net of fees · illustrative.

20% FUND-LEVEL RESERVE (CREDIT FACILITY) · CAPITAL CALL MECHANISM · LBMA SPOT AT EXECUTION

Two engines. *One NAV.*

The kilogram becomes *two compounding instruments at once.* The metal appreciates on its own arc. The credit it generates compounds on the pipeline's. The member's NAV is the sum.

GOLD HELD	CREDIT DRAWN	WORKING CAPITAL
1 kg+	*up to 75%*	*gold + drawn*

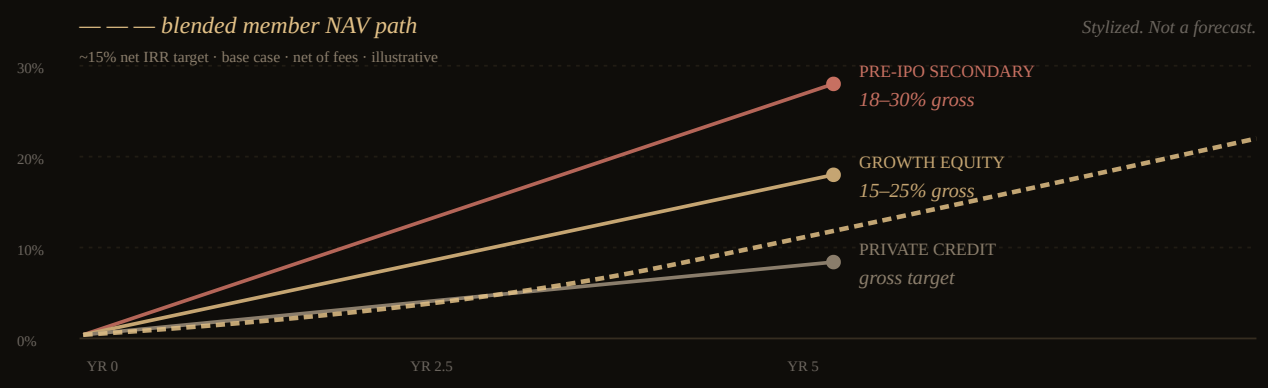
FIVE-YEAR PATH · ENGINE II · RETURN BANDS

gross IRR ranges · by deal type · illustrative



ENGINE I · GOLD FLOOR

Compounds at the rate of *money supply.*

The kilogram appreciates passively against won, dollar, yen — the asymmetry that makes families across Asia hold it in the first place. Aurum doesn't accelerate it. It simply stops the metal from sitting idle.

ENGINE II · THE PIPELINE

Compounds at the rate of *the deal book.*

The credit drawn against the bar deploys into pre-IPO equity and private credit at target gross ranges. The bar grows the floor; the deals grow the ceiling.

The metal sits still. The capital works. The NAV is the sum.

IV

The *Simplification.*

One filing. One subscription. One exit. The paperwork a member does once — not every time.

Four walls. *One subscription.*

Direct deployment of cross-border capital into US private positions encounters multiple Singapore-side and resident-side reporting layers. Each adds incremental compliance work per deal, per year.

One Singapore subscription consolidates the entity-level cycle.

1 FUND FILING · KOREAN LP-LEVEL OBLIGATIONS UNCHANGED

Resident-level obligations stay with the Member — including annual overseas-account reporting, capital gains on distributions, designated FX bank relationship. Aurum provides standardised K-1-equivalent documentation, source-of-funds support, and annual position summaries to support member's Korean tax counsel. The Singapore-side per-position cycle is consolidated at the Fund level; resident-level obligations stay with the Member. Members are advised to engage qualified Korean tax / FX counsel prior to subscription.

V

The *Platform.*

Where new deals reach you first.

The *pipeline*, gated.

In the quarters following first close, sourced positions rotate through the platform — member-gated, sequenced within the founding group. *A private channel, not a marketplace.*

WHAT IT IS

The single channel through which Aurum shares *sourced deal flow* with the founding group.

WHY IT EXISTS

Deal access in Asia is a *relationship problem*, not a pricing problem. The platform is the relationship.

WHAT YOU GET

First look on Aurum-sourced fund deals. Pro-rata allotment by Member commitment, with optional concentration above pro-rata available case by case under the Fund's side-letter framework (PPM §19).

Featured *deals*.

Two exceptional positions Aurum is sourcing to seed the fund.
The opening book.

Two deals. *One opening book.*

Aurum has sourced two positions of the kind that rarely clear an open market — one in frontier AI, one in defense autonomy. The fund forms around them. Participating members receive *pro-rata allocation in both* at first close.

DEAL № 01 · FRONTIER AI — LATE-STAGE SECONDARY

Position № 01

NAME DISCLOSED UNDER NDA

Frontier *AI infrastructure.*

Late-stage US AI-infrastructure secondary. Genuinely scarce at current valuation; primary market is closed.

Aurum participates through a direct-LP secondary allocation; access is by invitation through the manager's counterparty network.

AURUM ALLOCATION

$10M

TARGET · SUBJECT TO DEAL CLOSING

DEAL № 02 · DEFENSE AUTONOMY — PRE-IPO

Position № 02

NAME DISCLOSED UNDER NDA

AI-piloted systems for *allied defense.*

Pre-IPO defense autonomy with US government and allied counterparty exposure. Dual-use sector with potential liquidity events over the medium term.

Aurum participates through a late-stage allocation made available by a counterparty's portfolio adjustment.

AURUM ALLOCATION

$10M

TARGET · SUBJECT TO DEAL CLOSING

OPENING BOOK	PER DEAL	CLOSE TIMING	MINIMUM
$20M	*$10M*	*Q3 '26*	*1 kg*
two deals · closed together	*Aurum Funds allocation*	*subject to deal timing*	*at first close*

Sourced positions as of MMXXVI Q1 · subject to availability, allocation, and final terms at close.

Au

QUIETLY · FOREVER

For the *founding group.*

The opening book closes upon reaching capacity — Inaugural Close Q3 MMXXVI. *A counted set of seats.* Held until close.
